SUMMARY

Software engineer with 10+ years designing, building, and operating large-scale distributed systems, cloud-native platforms, and full-stack products at AWS, Tesla, and Western Digital, including senior roles leading teams of 5 to 10 engineers. Owns systems end-to-end, from architecture and API design through observability, operational readiness, and launch: event-driven serverless services handling ~873K events/day, a console migration serving 180K+ partners, and data platforms at 25TB scale. Brings hands-on agentic AI experience, from building agents on Amazon Bedrock to leading AI-assisted development adoption across ~450 engineers. Deep in Java, Spring Boot, .NET, TypeScript, React, and AWS.

TECHNICAL SKILLS

Programming Languages: Java, C#, Python, JavaScript, TypeScript, SQL

Backend Frameworks: Spring Boot, Spring Framework, ASP.NET Core, ASP.NET MVC, Node.js, Express, FastAPI

Frontend Technologies: React, Angular, TypeScript, JavaScript, jQuery, HTML/CSS, Highcharts, d3.js

Databases & Data: MySQL, MongoDB, DynamoDB, PostgreSQL, Redis, Elasticsearch, SQL/NoSQL, Data Warehousing (25+ TB), ETL, Power BI

Distributed Systems: Microservices, Event-Driven Architecture, Kafka, RabbitMQ, REST APIs, Real-time systems, Distributed Systems, Asynchronous Processing, High-Volume APIs

Cloud & DevOps: AWS (Lambda, EC2, S3, DynamoDB, RDS, API Gateway, SQS, SNS, Step Functions, CloudWatch, CloudFormation, CDK, KMS, Glue, Athena), Docker, Kubernetes, Terraform, Jenkins, GitLab CI/CD, Git, Maven, Gradle

Agentic AI & LLMs: LangGraph, MCP, RAG, Multi-Agent Systems, Agent Orchestration, Amazon Bedrock, Amazon Kendra, Claude, Cursor, Cline, Kiro, Amazon Q CLI

PROFESSIONAL EXPERIENCE

Amazon Austin, TX

Software Development Engineer II Aug 2024 - Present

- Led AWS Partner Central 3.0 and its 10-engineer team: a ~$5B program moving co-sell from Salesforce into the AWS Console as a React micro-frontend for 180K+ partners
- Architected Partner Account Connection in AWS Partner Central, leading a 5-member team on a ~$1.5B initiative
- Cut Partner Central 3.0 page load time 57% (4.2s to 1.8s) for 180K+ partners via lazy loading and bundle splitting
- Built automated partner funding (request, approval, claim) for payouts up to $50K per engagement across 4 services; the second flow reused ~70% of the first
- Owned Partner Account Matching from concept to pilot: privacy-preserving customer matching on AWS Clean Rooms, projected to generate $3.5B in value over 3 years
- Drove agentic AI adoption to 98% of ~450 engineers in 4 months as AI Ambassador; co-designed an AI dev method that shipped the hardest components ~60% faster

Tesla Austin, TX

Senior Software Developer Feb 2023 - Jul 2024

- Led a 5-member team building Tesla's web-based HR operating system services
- Built training, recognition, and profile apps for 300K+ users, saving $750K a year by replacing third-party tools
- Cut response time 75% and peak errors 90% on a candidate application module that crashed under load
- Optimized 3,000+ APIs across 5 HR applications, improving turnaround time ~30%

Intel Corporation Miami, FL

Graduate Compilers Intern May 2022 - Dec 2022

- Built Eva to automate 10+ compiler bug-hunting tasks, cutting testing from 4 hours to 45 min and catching 70+ bugs
- Shrank per-run compiler logs from 25MB to 10MB while keeping critical diagnostics

Western Digital Bangalore, India

Senior Software Development Engineer Aug 2017 - Jul 2021

- Led an 8-member team building BI and finance platforms that replaced proprietary tools, driving $4M+ in savings
- Built reusable Angular libraries that render UI from JSON config, cutting code size 35% and load time 40%
- Rebuilt a failing file-watcher pipeline on RabbitMQ, cutting customer complaints ~90% and saving $1.5M+ over 2 years
- Designed ~25TB data warehouses and consolidated team-by-team JIRA data into one, saving $450K+

Infosys Bangalore, India

Systems Engineer Dec 2015 - Aug 2017

- Core UI developer on India's Goods and Services Tax (GSTIN) application, used by 300M+ users
- Designed and built 80+ responsive pages and user personas that work across every viewport
- Built internal tools that generate PDF documents for appraisals, company announcements, and recognition

EDUCATION

Florida International University Miami, FL

M.S. in Computer and Information Science, GPA: 3.97/4 Dec 2022

Relevant Courses: Machine Learning, Data Analytics

Jawaharlal Nehru Technological University, Kakinada Andhra Pradesh, India

B.Tech. in Computer Science May 2015

ACHIEVEMENTS

- **GenAI Hackathon Winner (Amazon):** built an AI agent platform that turns a partner's business problem into a solution architecture, cost estimate, migration plan, and slide deck for sales teams
- **Lead with Purpose award (Tesla):** for proactively clearing backlog items and improving the application's reliability
- **Platinum, Gold, Silver, and Bronze High5 awards (Western Digital):** recognized repeatedly for fast-turnaround delivery
- **IBU Green Horn award (Infosys):** for dependability on critical, tight-deadline work and helping multiple teams
